

H&R Johnson launches a tile library

H&R Johnson launched Tile Library, a first-of-its-kind display format at Fort, Mumbai. At the inauguration by architect Hafeez Contractor, executive director & CEO Joydeep Mukherjee explained, "This small but meaningful library is being opened keeping in mind the challenge of practising architects needing immediate samples for their projects and space constraints in their offices to store huge amount of samples." The space displays innovative solutions such as anti-microbial large-format slabs and tiles, solar reflective tiles, staircase solutions that include skid-resistant step tiles, risers, landing tiles, etc.
